Sunil Chaudhari

Release Manager | Scrum Master | QA & Delivery Leader

sunilibn@gmail.com | +91-9657724967 | Pune, India | linkedin.com/in/sunilchaudhari21

PROFESSIONAL SUMMARY

Quality & Release Manager and Certified Scrum Master (CSM® | CSPO) with 15+ years in software delivery, Agile transformation, and QA leadership across HealthTech, AdTech, and enterprise SaaS. Experienced in leading cross-functional teams of 28+, managing end-to-end release governance, and driving Go/No-Go decisions with zero unplanned downtime. Skilled in Azure DevOps, CI/CD, JIRA, SLA governance, and stakeholder management — with a strong track record of aligning delivery teams to business objectives.

WORK EXPERIENCE

Quality & Release Manager – Technology *Dec 2021 – Present*

Bajaj Finserv Health Pune, India

- Led end-to-end release and deployment management for 10+ microservices through CI/CD pipelines on Azure DevOps, achieving 99.9% deployment success rate with zero-downtime production releases.
- Managed biweekly release cycles across 5+ product squads, coordinating release readiness meetings, deployment schedules, and go/no-go decisions with Product and Delivery Managers.
- Reduced post-release incident rate by 30% by introducing structured release notes, stakeholder communication templates, and post-release monitoring protocols.
- Facilitated Agile ceremonies includes sprint planning, daily stand-ups, retrospectives, backlog grooming, and sprint reviews, driving measurable improvement in Agile maturity across squads.
- Identified, escalated, and mitigated release risks proactively, ensuring alignment between engineering, QA, product, and infrastructure teams before every production push.
- Partnered with Product Managers to prioritize highest-value backlog items, improving sprint predictability and delivery velocity by 25%.
- PSE team leadership, production incident triage, partner API management, SLA governance, and ELK-based monitoring.

RunOps Manager / Scrum Master *May 2020 – Dec 2021*

Zimetrics Pune, India

- Managed end-to-end product delivery lifecycle from development to production for a SaaS platform, collaborating with cross-functional stakeholders across design, engineering, and QA.
- Owned CI/CD pipeline operations on a daily basis, prioritizing and coordinating production deployments and managing the weekly release regression cycle.
- Maintained and authored comprehensive test suites, providing actionable QA feedback to Product Managers to accelerate feature delivery.
- Facilitated Agile ceremonies (stand-ups, planning, backlog grooming, sprint reviews, retrospectives) and delivered weekly/daily status reports (WSR/DSR) to leadership.
- Proactively surfaced risks to stakeholders, reducing deployment-related incidents through structured risk communication and mitigation planning.

QA Lead *Aug 2018 – Apr 2020*

Market Logic Software Pune, India

- Led and managed the entire Pune QA team, overseeing test strategy, resource planning, and QA execution across multiple product releases.

- Managed weekly release regression cycles and prioritized production deployments through an active CI/CD pipeline.
- Reported project status, resourcing needs, and risk updates to the QA Director on a weekly basis through structured reports and stakeholder meetings.
- Engaged proactively with the QA Manager to address project risks, adjust resource allocation, and maintain delivery quality standards.

Sr. QA Engineer*Oct 2016 – Aug 2018*

AppDirect India Pvt Ltd Pune, India

- Owned QA responsibilities for an entire product module, covering test plan design, test case creation, and end-to-end test execution.
- Managed weekly release regression cycles and collaborated with the Product team on new feature development and acceptance criteria.
- Prioritized and coordinated production deployments, contributing to a stable and predictable CI/CD delivery pipeline.

Sr. Software QA Engineer*Feb 2010 – Jan 2016*

PubMatic India Pvt Ltd Pune, India

- Designed and executed comprehensive test plans, defining scope and objectives across all levels of QA testing (functional, regression, integration, UAT).
- Wrote complex SQL queries to validate data integrity and verify database content accuracy for advertising data pipelines.
- Set up and owned the UAT environment and process, ensuring stakeholder acceptance before production releases.
